Welcome Back, Dr Chinwe

Building a natural aesthetics practice in Lagos

The story, the storyboards and the release plan

For Dr Chinwe Kpaduwa and Dr Itunu Akinware

Prepared by Consult For Africa / 31 October 2026

A surgeon comes home to build the practice Lagos women have been flying abroad for

- **Title:** Welcome Back, Dr Chinwe. Building a natural aesthetics practice in Lagos.
- **The story:** Dr Chinwe trained and practised abroad, and has come home. Each episode follows one step of building her practice, in her own words.
- **Who it is for:** Lagos women who have looked at London or Dubai for aesthetic care, and the doctors who refer them.
- **What it does:** Builds trust before a first consultation. A viewer meets the surgeon, sees the clinic and hears how she works before she books.
- **The thread:** Natural results. Looking rested, not done. One surgeon from the first consultation to the final review.
- **The format:** One episode for each visit home, 3 to 4 minutes, with a 60-second cut and short clips from every episode.
- **The voice:** Hers. No narrator; the conversation by the pool carries each episode.

Every episode ends with a way to book. The journey is never a waiting room.

Coming home is the hook, and it repeats: each visit home is a new episode.

Three chapters, one episode for each step and each visit home

1. Welcome Back	Coming home	November 2026	Estate, MedLYFE clinic	She is here, she is seeing patients, and this is how she works	Clinic filmed; estate Mon 2 Nov

5. One Year On	Open	Last visit of 2027	The Lyfe Place, Lekki	What the practice has become; the team she has built	Plan on her return

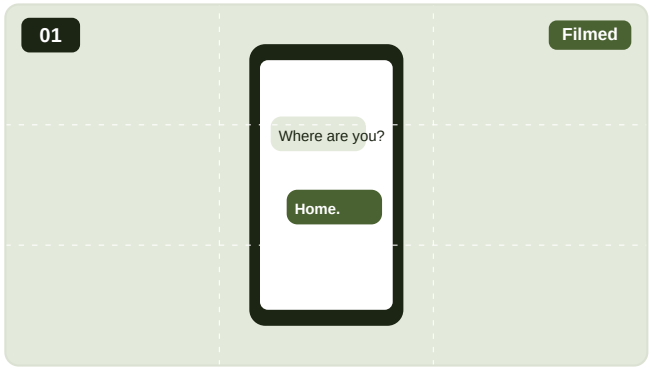

- **Between visits:** clips, the doctor films and a waiting list for her next visit keep the series running while she is away.
- **The five films from Thursday and Friday:** Episode 3 is built from the clinic film; the patient and doctor films run alongside as clips.

She is home, and the practice is already running
