NAME
Ilé is a working name

# Ngozi lives in London. Her mother lives alone in Lekki.

An illustrative family. Her mother's last years, as they happen in Lagos today.

| | |
|---|---|
| Ageing at home | Her mother falls at 74. Ngozi hires a carer through a friend, and never meets her. |
| Post hospital stay | After a hip operation her mother is home in four days. No one helps her walk again. |
| Needing care | She can no longer live alone. The homes Ngozi finds have no nurse at night. |
| The last months | A cousin manages her pain at home, with no nurse and no doctor. |
| After death | She dies on a Tuesday. Ngozi lands on Friday. The hospital mortuary is full. |

Ngozi pays for all of it from London, in pieces, and sees none of it.

# End-of-life care is one of the largest markets in health care, and Nigeria has more older people than any other country in Africa.

It is everything a person needs in the last years of life. It begins when an older person first needs help to live at home and ends after their death. Along the way come the falls, operations and strokes that need recovery, the move into care, and the last months. In mature markets each of these is a large industry of its own.

WORLD

**~$2trn**
a year on care for older people, 2025

**$114bn**
a year on death care services, 2025

**51.7%**
of Americans on Medicare who died in 2023 used hospice

**2.5%**
of people aged 65+ in England and Wales live in a care home

NIGERIA

**14.8m**
Nigerians aged 60 and over, the most in Africa (WHO, 2020)

**~3x**
growth in Nigerians aged 65 and over by 2050 (UN)

**2.6m**
deaths a year in Nigeria

**$21.8bn**
sent home in 2025 by over 20 million Nigerians abroad

In Nigeria little of this is organised, and none of it is offered as one service. That is the opening Ilé is built for.

# Abroad, five companies earn $17bn a year from these five stages. In Nigeria, families and informal carers fill every one.

| STAGE | THE LEADER ABROAD | NIGERIA: MOSTLY INFORMAL | THE GAP |
|---|---|---|---|
| Ageing at home | amedisys $2.35bn revenue, Amedisys, 2024 | Family members and untrained informal carers; a few agencies | No vetted carers. Nobody checks who enters the house, or that the visit happened. |
| Post hospital stay | Encompass Health $5.94bn revenue, Encompass Health, 2025 | Family at home; one 40-bed rehabilitation centre, opened in Lekki in 2024 | Too few step-down beds, and no rehabilitation at home. Most patients go home to nothing. |
| Needing care | Brookdale Senior Living $3.19bn revenue, Brookdale, 2025 | Family at home; a handful of small homes at ₦79,000 to ₦249,000 a month | No nursing-grade residence, with vetted staff, secure premises and a nurse at night. |
| The last months | VITAS Healthcare $1.6bn revenue, VITAS, 2025 | Family at home; cancer centres and teaching hospital units | No hospice outside cancer care. Most people die at home without pain control. |
| After death | SCI $4.19bn revenue, Service Corporation Intl, 2025 | Full hospital mortuaries, funeral homes of uneven standard | No mortuary between Lagos Island and Epe. Elsewhere, no trusted standard. |

**Ilé fills all five gaps, as one company, on one family record.**

Revenue from company filings; VITAS is the sum of 2025 quarterly figures. Logos are their owners' trademarks.

# What Ilé promises every family.

1

AT HOME

You will know who is in your mother's house, and that the visit happened.

2

AFTER HOSPITAL

She will not be sent home from surgery to manage alone.

3

IN RESIDENCE

A nurse will be awake every night.

4

THE LAST MONTHS

Her pain will be managed, and someone will be with her.

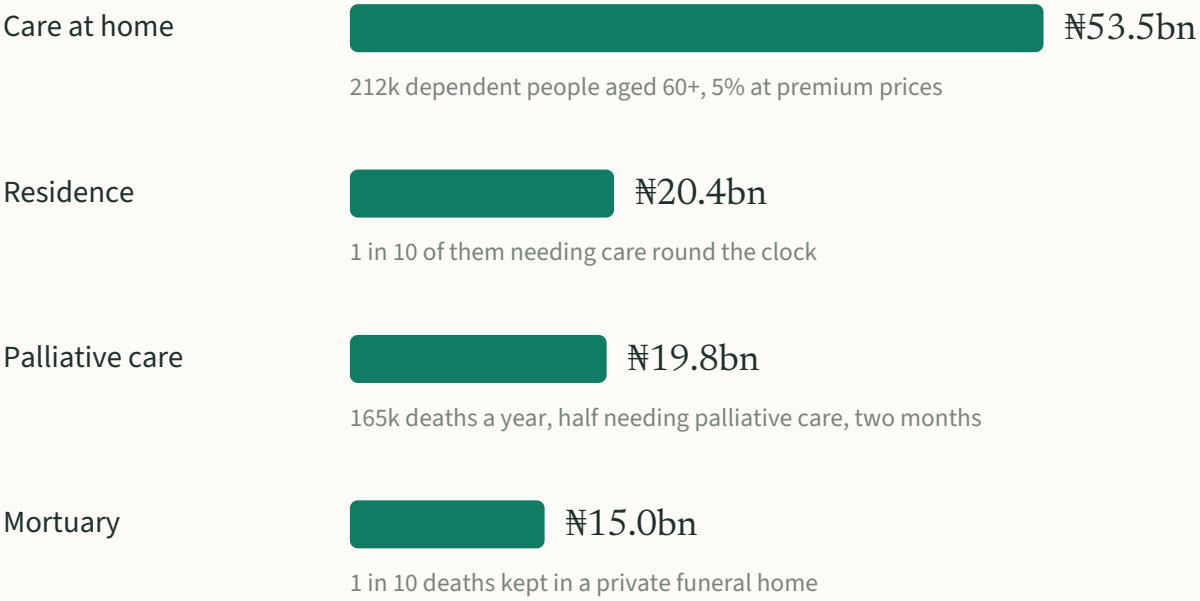

5

AFTER DEATH

She will be kept with dignity until you are home.

Each promise is something we measure and report to the family every month.

# Lagos alone is a ₦109bn a year market at premium prices. Year five needs 3% of it.

CHECKED AGAINST MATURE MARKETS

## Residence

If premium Lagos families used care homes at the English rate of 2.5%, there would be 938 residents. Our sizing uses 1,061.

## Palliative care

At the American hospice rate of 51.7% of deaths, 4,265 premium families a year. Our sizing uses 4,125.

## Concierge

Emoha in India charges $60 to $145 a month for check-ins and emergency cover. Ilé's ₦650,000 adds a named doctor and hospital visits.

Bottom up: Lagos 15m people, 5% aged 60+, 28.3% of those dependent, 165,000 deaths a year at 11 per 1,000; 5% of families able to pay these prices or funded from abroad. Care at home includes concierge and rehabilitation.

# Families already pay for every stage. Nobody sells them all of it.

WHAT THE MARKET ALREADY PAYS

### Care paid from abroad

Gerocare has sold home doctor visits to diaspora families since 2017. Reliance Health raised $40m in 2022 and sells Alafia, a health plan children buy for their parents.

### Residential care

Lagos homes charge ₦79,000 to ₦249,000 a month; one charges $437 to $679, above most Nigerian household incomes.

### A premium for a better mortuary

Families pay ₦15,000 to ₦50,000 a day in a private home against ₦3,000 to ₦5,000 in a public one.

### Remains flown home

A recent UK case needed £10,000 to bring a body home.

### Unmet need

60% of older people in urban Nigeria have unmet needs for daily care.

WHAT THIS ROUND PROVES

Ilé has not yet taken a paying client. The round is built to prove four things before the residence opens:

- 60 care-at-home clients and 30 concierge members by Apr 2028
- 7 residence places reserved with a deposit before opening in Jan 2028
- The mortuary holding 32 bodies a day within a year of opening
- Surgeons referring post-operative rehabilitation every month

# Twelve revenue streams: eleven across the last years of life, and the software that runs them.

| Stream | What the family buys | Price | Y5 ₦m | Share |
|---|---|---|---|---|
| Concierge geriatric care | A named doctor and care manager, a 24-hour line, a companion at hospital visits | ₦650,000 a month | 432 | 14% |
| Care at home | Nurse, carer and physiotherapy visits, by subscription or visit | ₦420,000 a month on average | 521 | 17% |
| Virtual consultations | Doctor reviews by video, notes on the family record | ₦30,000 each | 118 | 4% |
| Post-operative rehabilitation | Six weeks at home after surgery: physiotherapy, nursing, wound care | ₦1,200,000 a package | 200 | 6% |
| Step-down beds | Short stays after a hospital discharge or surgery, with daily therapy | ₦85,000 a day | 184 | 6% |
| Residence | Assisted living and nursing care, staffed day and night | ₦1,600,000 a month | 420 | 13% |
| Palliative wing | Pain control and comfort in the residence | ₦2,400,000 a month | 172 | 6% |
| Palliative care at home | The same team, in the family's house | ₦900,000 a month | 254 | 8% |
| Mortuary preservation | Cold storage while the family gathers | ₦18,000 a day | 420 | 13% |
| Preparation and repatriation | Embalming, dressing, transport; remains received from abroad | ₦280,000 a case; ₦1,200,000 a repatriation | 244 | 8% |
| Autopsy and pathology | Post-mortems for families, hospitals, insurers and coroners | ₦400,000 an examination | 54 | 2% |
| Software licence | Ilé's care platform, licensed to agencies, care homes and hospices | ₦250,000 a month per organisation | 103 | 3% |
| Total | | | 3,122 | 100% |

Not in the model, and open to us later: medicines and supplies to clients, a carer training school, and eldercare as an employee benefit.

# Where the families come from, and how few of them year five needs.

## CHANNELS INTO EACH STREAM

| | |
|---|---|
| **Families abroad**<br>Diaspora associations, churches abroad, search, referral | Concierge, care at home, residence |
| **Families in Lagos**<br>Family physicians, churches and mosques, referral | Care at home, residence |
| **Surgeons and hospitals**<br>Discharge planners, orthopaedic and spine surgeons | Rehabilitation, step-down |
| **Ilé's own record**<br>Escalation signals: acuity, falls, admissions, carer strain | Residence, palliative care |
| **The city**<br>Hospitals, insurers, coroners, churches and mosques | Mortuary, autopsy, repatriation |
| **Other care providers**<br>Agencies, care homes and hospices across Nigeria | Software licence |

## YEAR FIVE AGAINST THE LAGOS POOL

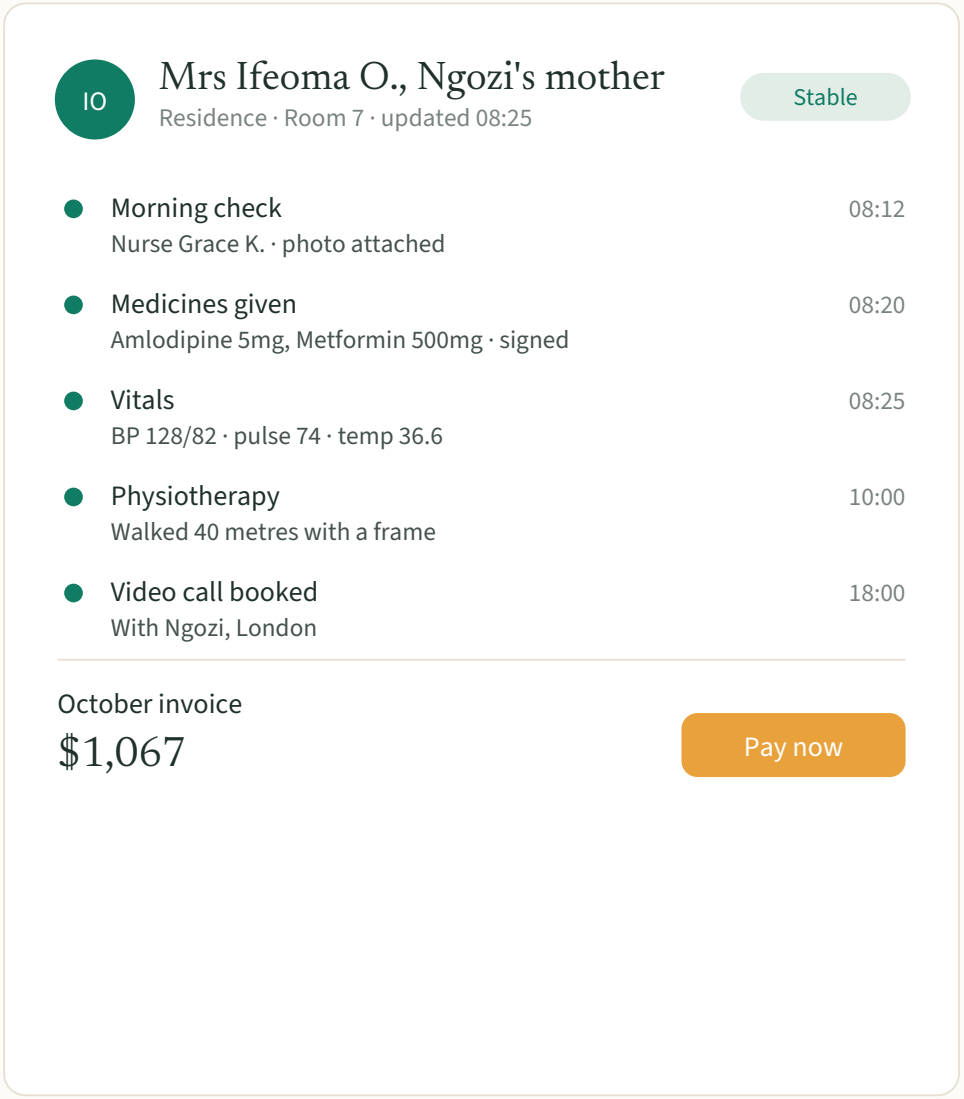

| Year five | Ilé | Pool | Share |
|---|---|---|---|
| Care at home clients | 110 | 10,612 | 1% |
| Concierge members | 60 | 10,612 | 1% |
| Residents | 22 | 1,061 | 2% |
| Palliative patients a year | 186 | 4,125 | 5% |
| Mortuary families a year | 667 | 16,500 | 4% |

Pool: premium families in Lagos, from the market sizing. Rehabilitation and step-down are fed by surgeons' lists, about 180 packages and 104 step-down admissions a year by year five.

# From London, Ngozi sees every visit, every dose and every reading.

Every visit is checked in and out. Every dose is signed for. Vitals are recorded against a trend. Photographs are shared where the family has consented. A written report arrives each month with one bill. The record follows a loved one from the first visit into the residence without being keyed in again.

- Every carer identity-checked, referenced and background-checked before a first visit
- Carer app works without signal and syncs when it returns
- Every clinical entry is audited: who wrote it, when, what changed
- The same record watches for escalation, which is the residence's admissions list
- Registered under the Nigeria Data Protection Act 2023 before the first family record exists

Illustrative screen. Names and readings are examples.

# Each competitor sells one or two stages. Ilé sells all of them, on one record.

| | Concierge geriatric | Care at home | Virtual consults | Rehab and step-down | Residence | Palliative care | Mortuary | Family record, FX billing |

● offers ◑ partly From each provider's public website and press coverage, October 2026.

**One family, acquired once**
Joins for care at home, stays to the end.

**The record fills the beds**
Escalation signals are the admissions list.

**Proof for the payer abroad**
Every visit visible, billed in her currency.

**Clinical governance**
A surgeon co-founder and an acuity ceiling.

# There is no mortuary between Lagos Island and Epe. Ilé's serves that corridor and earns the steadiest margin in the company.

Lagos families hold a body for weeks, not days, while relatives travel home and the funeral is arranged. Demand does not depend on Ilé's care book, does not move with the economy and is paid before release. Hospital mortuaries are full and private homes vary widely. A clean facility with reliable cold storage and honest prices has room in this market.

- Sited on the Lekki corridor: there is no mortuary between Lagos Island and Epe
- Preservation, embalming, dressing and viewing
- Transport within Lagos
- Receipt of remains flown home from abroad, with the paperwork handled
- Autopsy and pathology: post-mortems with histology for families, hospitals, insurers and coroners, in our own suite with a consultant pathologist
- Opens with 40 places in Aug 2027, expands to 80 in Aug 2029

| At 80 places, 80% full | A month |
|---|---|
| Bodies held on an average day | 64 |
| Families served | 56 |
| Autopsies | 12 |
| Average stay | 35 days |
| Revenue | ₦60m |
| EBITDA | ₦31m, 51% |

PARTNERSHIPS AROUND IT

- Hospitals without a mortuary or pathologist: storage and post-mortems by contract
- Life insurers and HMOs: cause-of-death reports for claims
- Coroners, police and the courts: medico-legal post-mortems
- Funeral directors and repatriation firms abroad
- Medical schools: pathology training placements

Priced at ₦18,000 a day and ₦280,000 a case, inside the ₦15,000 to ₦50,000 a day Lagos funeral homes charge. Autopsy fee is an estimate.

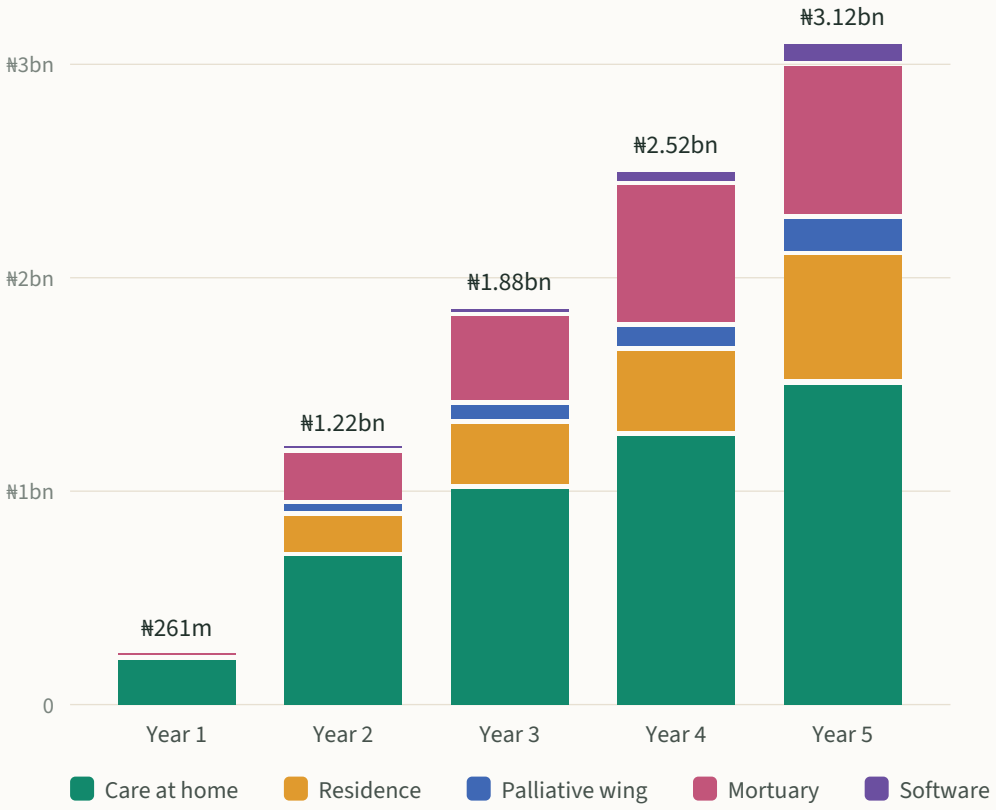

# Every stream pays its own way once it is full.

| Stream | Unit | Revenue a month | Contribution | Margin |
|---|---|---|---|---|
| Concierge geriatric care | per member | ₦650,000 | ₦325,000 | 50% |
| Care at home | per client | ₦420,000 | ₦168,000 | 40% |
| Post-operative rehabilitation | per six-week package | ₦1.2m | ₦540,000 | 45% |
| Palliative care at home | per patient | ₦900,000 | ₦315,000 | 35% |
| Virtual consultation | each | ₦30,000 | ₦16,500 | 55% |
| Software licence | per organisation | ₦250,000 | ₦175,000 | 70% |
| Residence, 20 beds | 11 long-stay, 3 step-down, 3 palliative filled | ₦33m | ₦2.7m EBITDA | 8% |
| Mortuary | 80 places, 80% full | ₦60m | ₦31m EBITDA | 51% |

## KEY ASSUMPTIONS

- Residence: staffing ₦13m a month loaded with on-costs, nurses on every shift; building lease ₦100m a year, paid a year ahead; building works ₦200m and equipment ₦130m
- Residence opens with 7 of 20 beds filled and adds about one a month; step-down stays average 21 days
- Central team ₦5m a month rising to ₦12m; marketing ₦1.5m rising to ₦2.5m
- Naira at ₦1,500 to the dollar throughout; all figures before tax

# ₦3.12bn revenue and 32% EBITDA in year five, with no further equity.

| ₦m | Y1 | Y2 | Y3 | Y4 | Y5 |
|---|---|---|---|---|---|
| Care at home | 236 | 719 | 1,037 | 1,284 | 1,524 |
| Residence | 0 | 189 | 304 | 397 | 604 |
| Palliative wing | 0 | 54 | 86 | 112 | 172 |
| Mortuary | 25 | 241 | 416 | 663 | 718 |
| Software | 0 | 15 | 36 | 65 | 103 |
| Revenue | 261 | 1,218 | 1,879 | 2,521 | 3,122 |
| EBITDA | -42 | 139 | 524 | 675 | 993 |
| Capital spend | 446 | 119 | 90 | 330 | 0 |
| Cash, cumulative | -575 | -544 | -110 | 246 | 1,239 |
| EBITDA margin | -16% | 11% | 28% | 27% | 32% |

Year one is November 2026 to October 2027. Before tax. Care at home includes concierge, rehabilitation, consultations and palliative care at home; residence includes step-down. Residence two opens in May 2030, paid for from cash flow.

# $500k for 30% covers a ₦677m peak, and ₦738m if the plan runs slow. No further round is in the plan.

USE OF THE $500K (₦750M)

| Use | ₦m |
|---|---|
| Mortuary: building, cold storage, autopsy suite, vehicles | 235 |
| Residence: building works to a licensable care home | 200 |
| Residence: equipment, furnishing, nurse call, power, pre-opening | 130 |
| Residence building lease, a year paid ahead | 100 |
| Mortuary site lease, a year paid ahead | 40 |
| Operating cash to the low point, net of residence deposits | -28 |
| Reserve against a slower plan | 73 |
| Total | 750 |

IF THE PLAN RUNS SLOW

| Case | Peak funding |
|---|---|
| Base case | ₦677m |
| Residence fills at half speed | ₦699m |
| Mortuary fills at half speed | ₦714m |
| Care at home at half the clients | ₦734m |
| Concierge at half the members | ₦717m |
| No software licences sold | ₦681m |
| Residence opens six months late | ₦607m |
| Residence and mortuary at half speed | ₦738m |

Every case fits inside the ₦750m. EBITDA is positive from Mar 2028 and cumulative cash is back above zero by Jun 2030. Everything sits in Ilé: the leases, the building works, the equipment, the platform and the licences.

# At year five, Ilé is worth $5.3m to $7.9m on six to ten times EBITDA.

The round: $500k for 30%, which values Ilé at $1.2m before the money and $1.7m after. Equity value at exit is year-five EBITDA of ₦993m times the multiple, plus ₦1.99bn of cash, at ₦1,500 to the dollar, before any later dilution.

| Exit multiple | Ilé's equity value | The investor's 30% | Multiple on $500k |
|---|---|---|---|
| 6x EBITDA | $5.3m | $1.6m | 3.2x |
| 8x EBITDA | $6.6m | $2.0m | 4.0x |
| 10x EBITDA | $7.9m | $2.4m | 4.8x |

If the naira weakens to ₦2,000 to the dollar by exit, the 8x equity value is $5.0m. Families abroad pay in dollars and pounds, which softens this.

The multiples are a discount to developed markets: Service Corporation International trades at about 12 times EBITDA and Amedisys sold for about 13 times.

Software licences bring in ₦103m in year five, valued here at the same EBITDA multiple as the care business rather than a software multiple.

Beyond year five: further residences in Lagos and Abuja, a second mortuary, and the same record serving each. None of it is in these numbers.

# What could go wrong, and what we do about it.

| Risk | What we do about it |
|---|---|
| The residence fills slowly | It opens with places reserved by deposit, filled from care at home and step-down. The model assumes 7 of 20 beds on day one. |
| Families object to a care home | We sell first to families abroad, who already pay others to care, and let the family record show the standard. |
| A clinical failure | Admissions capped at an acuity ceiling set by the clinical co-founder. Every clinical entry audited. Two hospitals agree to receive emergencies before the residence opens. |
| Pain relief supply | Controlled medicines are limited in Nigeria. We dispense through a licensed hospital pharmacy under the palliative lead. |
| The naira | Families abroad pay in dollars or pounds, which covers imported consumables and equipment. |
| Losing trained staff | Pay above the Lagos agency rate, a path from carer to nurse, and a clinical leadership share pool. |

# Capital, an operator who has built and sold a healthcare business, and a clinical standard.

### THE ROUND

| Terms | |
|---|---|
| Raising | $500k |
| For | 30% |
| Pre-money | $1.2m |
| Post-money | $1.7m |

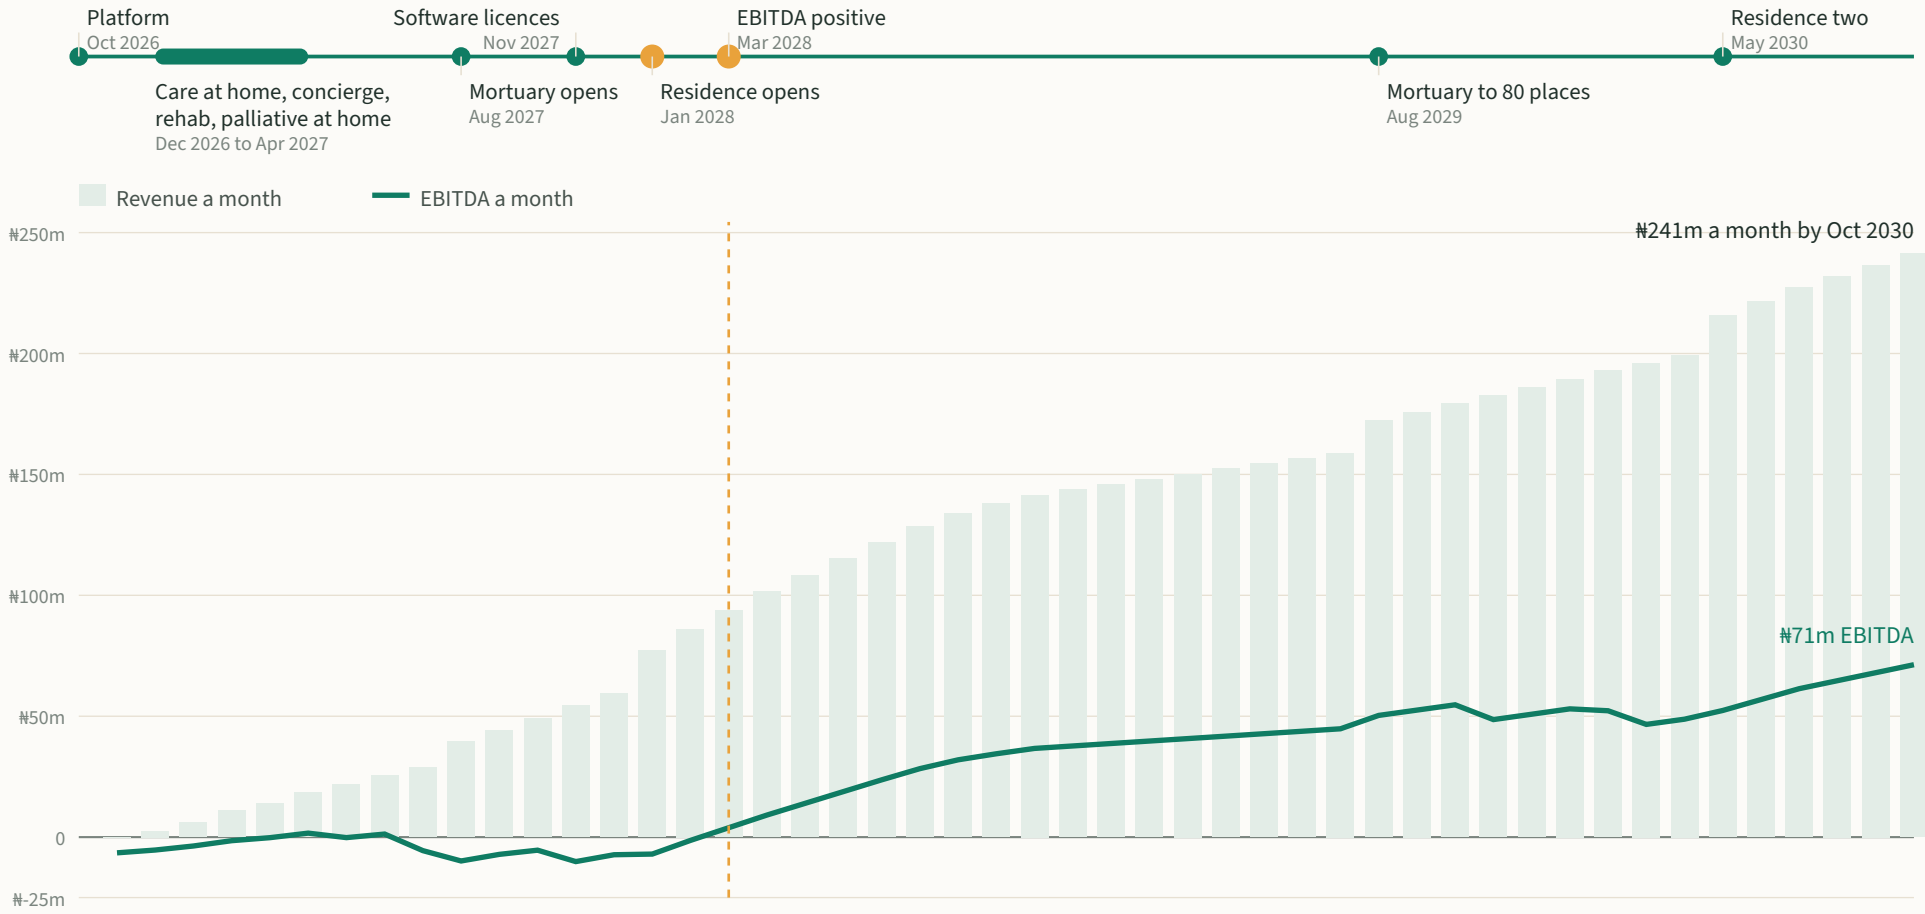

### SENIOR HIRES THIS ROUND PAYS FOR

- Head of technology, for the platform and software licences
- Residence manager, a registered nurse
- Head of care operations for home, rehabilitation and palliative care
- Mortuary manager and a sessional consultant pathologist

### GOVERNANCE

- Founder shares vest, with good and bad leaver terms
- Clinical governance committee chaired by Dr Anele
- Investors' reserved matters agreed in the round

# Every line is trading by Jan 2028. EBITDA turns positive in Mar 2028 and keeps rising.

Cash is lowest at ₦677m in Dec 2027, before the leases and building works start paying back. The $500k raise covers it.

Ilé

# $500k for 30%, to ₦3.1bn of revenue and 32% EBITDA by year five.

Care for the last years of life in Lagos, from the first visit to the funeral, on one record, with the family abroad seeing every day of it.

Kemi Balogun · kemotoks@hotmail.com
