How to use this

The handbook tells you to keep one page of numbers, run a fixed agenda, write a board note and record what you find. These are those pages. Print them, fill them in by hand, and only move them onto a screen once the habit is established, because a form you fill in yourself is a form you read.

Nothing here is clever. The value is entirely in the repetition.

01 The monthly numbers page

One page, same day every month, written by you. Section 2 of the handbook explains why it has to be your handwriting.

Month: _____ Completed on: _____

The number	This month	Last month	Direction	Note
Paediatric occupancy				
NICU occupancy				
Admissions				
Average length of stay				
Revenue				
Revenue per NICU admission				
Cash collected				
HMO receivable				
Debtor days				
Pharmacy stock value				
Stockouts				
Tariff lines priced				
Seen, billed, receipted gap				
Payroll as a share of revenue				
EBITDA margin				

The one number that surprised you, and what you did about it.

02 The daily huddle card

Fifteen minutes, standing, same place, same time. Carry this.

> *What happened overnight that the day shift needs to know?*
>
> *Who is in a bed, what is the plan for each, and who is going home today?*
>
> *What will stop us today, and who is fixing it?*

Today
For discharge, and by when
Blocked, and who owns it
Admissions expected
NICU cots free
Short on the roster
Stock exceptions

The discharge line is the one that pays. A hospital that decides at nine has the bed by noon.

03 The weekly operating review

An hour, same day each week, same order. An action without a name and a date is a conversation.

Agenda	Owner	Time
Occupancy and admissions, by unit		10 min
Cash: collections, receivables, what moved		10 min
Stock exceptions and stockouts		5 min
People: roster, gaps, overtime		10 min
Standards and incidents, actions closed		10 min
Open actions from last week		10 min
Escalations and decisions needed		5 min

Action	Owner	By when	Done

04 The board page

One page. The decision you need goes at the top, not the bottom. Shorter in a bad month, not longer.

Month: _____

What I need decided
What moved this month
What did not move, and why
The number to watch
Risks I am carrying
Next month

05 The tariff repricing worksheet

Twenty lines a day. Start with what moves most often, not the top of the alphabet.

Line	Do we do it?	Peer price	Self-pay	HMO	Reaches the bill?

Running total of lines priced: _____ of 2,413. Started at 461.

A price you can source is a price you can hold. Record where each peer price came from, because you will be asked.

06 The HMO reconciliation sheet

One per payer per month. Do this before you make the call, never after.

Payer: _____ Period: _____

	Ours	Theirs	Difference
Claims submitted			
Value submitted			
Claims paid			
Value paid			
Claims queried			
Claims rejected			
Outstanding			

Disputed claim	Date	Value	Reason given	Our evidence

Agreed undisputed amount: _____ Payment date agreed: _____

07 A standard of work

One page, dated, owned, kept where the work happens. Written with the people who do it, never at them.

What this covers	
Who it applies to	
Owner	
Written with	
Date written	
Review date	

What good looks like, step by step.

Who checks it, and how often	
What to do when it cannot be followed	

08 The incident and near miss register

A near miss is the valuable one, because it is a free lesson. Look for the system cause, never for a person.

Date	What happened or was caught	Reached a patient?	Contributing factors	Action	Owner	By	Closed

An action list that never closes teaches people that reporting changes nothing. Close them, and be seen to.

09 The licence register

Check this in your first fortnight. A lapsed licence is the hospital's exposure, not only the individual's.

What	Holder	Number	Expires	Reminder set	Owner
Facility registration					
Premises					
Waste					
Laboratory					

Every clinician's practising licence belongs on this sheet, checked rather than assumed, with a reminder ninety days ahead.

10 The ninety-day tracker

Three things at a time. Not thirty.

Window	What I am doing	Done by	Evidence it is done	Status
Weeks 1 to 2				
Weeks 3 to 6				
Weeks 5 to 8				
Weeks 7 to 12				

What I found in the first fortnight that nobody told me about.

What I think the plan gets wrong, from inside the building.

Bring that last page to me. It is the one I most want to read.
