CLIENT	PRODUCTION	DATE
Consult for Africa, for MedLYFE Wellness and Longevity Centre	One shoot day, three locations, five setups. Against invoice IVN07100601	Thursday 8 October 2026. First roll 10:00

The day in one paragraph

A ten o'clock first roll and a six o'clock wrap, across three locations in this order: Tom Ogboi Avenue in the morning, our studio at Treasure Gardens Estate on Freedom Way over lunch, and the MedLYFE clinic from three o'clock. Travel, lunch and breaks are set in the schedule rather than squeezed between takes. The quote covers three long films of three to five minutes, six short films of forty five seconds and twenty retouched stills. We have written ten storyboards so there is a choice to make rather than a list to film: pick three long and six short, and the tenth can be added on the day as an extra short at N14,000 plus VAT. Everything here is built to be sent one to one, by a coordinator, to a person who enquired and has not yet booked.

Locations

	Address	Setups	Stories
1	2-4 Tom Ogboi Avenue, Lekki Phase 1	Warm interior, seated low. Entrance or terrace in shade	1, 2, 3
2	Kakulus Studio, Treasure Gardens Estate, Freedom Way, Lekki	Dark portrait set: near black, single source, matched to Dr Kpaduwa's existing portrait	4, 5, 6
3	MedLYFE clinic, inside i-Fitness, 25 Admiralty Way, Lekki Phase 1	Consultation room in daylight. Treatment room, equipment visible	7, 8, 9, 10

On camera

	Who	When
Principal	Dr Chinwe Kpaduwa, MD FACS	The full day. One look per setting, from the options below
Second contributor	MedLYFE's physician (Dr Adedotun Ajelabi, Clinical Lead, to be confirmed by Dr Akinware)	15:15 to 17:05 at the clinic, for Story 8
Hands	A MedLYFE colleague, gloved	Story 10 only. Hands and equipment, no face
Nobody else	No patients, no models, no extras	

Schedule

Time	Where	What
08:30	2-4 Tom Ogboi Avenue, Lekki Phase 1	Crew call. Load in, light the warm interior, prompter set up
08:45	Tom Ogboi	Makeup by Dr Kpaduwa's own artist, to her direction. Look one
09:45	Tom Ogboi	Mic, prompter check, walk the lines
10:00	Tom Ogboi, warm interior	**Roll. Story 1, Aftercare (long).** Shot first so it is safe if the day slips
10:55	Tom Ogboi	*Break, 10 minutes. Water, touch-up*
11:05	Tom Ogboi, warm interior	Story 3, Two in the morning (short)

Time	Where	What
11:25	Tom Ogboi, entrance in shade	Story 2, Why not fly (short). Arrival b-roll
11:45	Tom Ogboi	Stills: 5 environmental portraits
12:00	Tom Ogboi	Wrap and load out
12:15	Travel	*To Treasure Gardens Estate, Freedom Way. 30 minutes allowed*
12:45	Kakulus Studio, Treasure Gardens Estate, Freedom Way, Lekki	*Lunch, 30 minutes, seated, for everyone.* Change to look two in the second half while the director and camera light the portrait set
13:15	Studio	**Stories 4, 5 and 6 (shorts),** back to back, one setup
14:10	Studio	Stills: 7 portraits, colour and black and white
14:25	Studio	Wrap. Change to look three
14:35	Travel	*To MedLYFE, 25 Admiralty Way. 25 minutes allowed*
15:00	MedLYFE, inside i-Fitness, 25 Admiralty Way, Lekki Phase 1	Arrive. Crew lights the consultation room. *Dr Kpaduwa rests for 20 minutes, then a touch-up*
15:15	Clinic	Physician arrives for briefing; her artist checks the physician for shine
15:30	Clinic, consultation room	**Story 7, Your consultation (long).** Dr Kpaduwa alone
16:15	Clinic	*Break, 10 minutes.* Change to look four
16:25	Clinic, consultation room	**Story 8, Who looks after you (long),** with MedLYFE's physician
17:05	Clinic, consultation room	Physician released. Story 9, The questions I ask (short)
17:20	Clinic	*Relight the treatment room. Comfort break, 15 minutes*
17:35	Clinic, treatment room	Story 10 if confirmed, hands and equipment only
17:55	Clinic	Stills: 8 images, consultation room, two-shot, detail
18:10	Clinic	Wrap. Rushes checked and backed up before the crew leaves. Clear by 18:30

If the day slips, Stories 1 and 7 must survive. Story 1 is shot first for that reason. At the clinic, Story 7 goes before the two-hander so it is not squeezed by the physician's window. Story 10 and the last stills are the first things to drop.

Crew and kit

Crew	Kit
Director, photographer, sound recordist, camera and prompter operator. Makeup is Dr Kpaduwa's own artist, not ours	Cameras and lenses, lighting and grip, sound kit, teleprompter. Physical drive for all rushes

Makeup

Dr Kpaduwa brings her own makeup and her own artist, who is on set all day and directs her look. Our director will ask for touch-ups between stories and before every still, and will flag shine under the studio light, but the artist has the final word on her face. MedLYFE's physician needs powder only. We will ask her artist to check her before Story 8, and we carry blotting papers if not.

Wardrobe: four options, one per setting

Dr Kpaduwa's own clothes, chosen by her. These are the brief for each look, not a styling decision. Please bring all four; the fourth is the spare and the alternative for the two-hander.

Look	For	The brief	Avoid
1. Warm and relaxed	Tom Ogboi, Stories 1 to 3, and the morning stills	Soft tailoring or a relaxed dress in warm neutrals: sand, camel, cream, bronze. Something she can sit low in for an hour	Pure white, which burns out by the window
2. The portrait	Studio, Stories 4 to 6, and the portrait stills	Black or very deep tones, close to her existing portrait. A clean neckline, minimal gold jewellery	Shine and sequins, which flare under a single source
3. Clinical	Clinic, Stories 7, 9 and 10	Plain scrubs, or a tailored dress with a clinic jacket, in black or deep green. If she wears her own branded scrubs, the mark should sit out of the main shot	Any logo other than MedLYFE's in frame
4. The conversation	Clinic, Story 8 with the physician. Spare for any look	A step warmer than look three, so the two-hander reads as a conversation rather than a ward round	Matching the physician's colour

For every look: no fine stripes, checks or small patterns, which strobe on camera. Nothing that rustles against the lapel mic, and jewellery that does not clink. Each look pressed and on a hanger, with a second top in case of a mark.

Rules on set

· **No patients, and no patient images of any kind.** Nobody in frame who could be read as a patient. No before and after.

· **No treatment on camera, on anybody.** The treatment room is equipment, environment and a colleague's hands.

· **No brand names and no prices spoken.** Generic names only. If one slips, tell the producer and we retake the line.

· **Dr Kpaduwa explains; MedLYFE books.** Every end card and call to action is MedLYFE's, never hers.

Ten storyboards to choose from

Each one answers a single hesitation that stops a booking, and says who a coordinator would send it to. Mark three long and six short to shoot. The tenth, if it is wanted, is the extra short. Frames are summaries of what she says, not scripts: the prompter text comes from the approved scripts.

#	Story	Format	Location	Shoot?
1	Aftercare: the part nobody quotes for	Long film, 3 to 5 minutes	Tom Ogboi, warm interior	Yes / No
2	Why not just fly to Istanbul?	Short, 45 seconds	Tom Ogboi, entrance or terrace in shade	Yes / No
3	What happens at two in the morning	Short, 45 seconds	Tom Ogboi, warm interior	Yes / No
4	The work nobody can point at	Short, 45 seconds	Studio, dark portrait set	Yes / No
5	What I will not do	Short, 45 seconds	Studio, dark portrait set	Yes / No
6	Darker skin is not lighter skin with more pigment	Short, 45 seconds	Studio, dark portrait set	Yes / No
7	What actually happens at your consultation	Long film, 3 to 5 minutes	MedLYFE clinic, consultation room	Yes / No

#	Story	Format	Location	Shoot?
8	Who looks after you when I am not in the country	Long film, 3 to 5 minutes	MedLYFE clinic, consultation room	Yes / No
9	The questions I ask before anything else	Short, 45 seconds	MedLYFE clinic, consultation room	Yes / No
10	What is in the room if something goes wrong	Short, 45 seconds (the optional extra)	MedLYFE clinic, treatment room	Yes / No

Our recommendation is all ten: Stories 1, 7 and 8 as the long films, Stories 2, 3, 4, 5, 6 and 9 as the six shorts, and Story 10 as the extra. The day above is planned to fit all of them.

STORY 1 · LONG FILM, 3 TO 5 MINUTES · TOM OGBOI, WARM INTERIOR

Aftercare: the part nobody quotes for

The hesitation	"Who looks after me when everyone has gone home?"
Sent to	Anyone who has asked about recovery, time off work, or what happens after the operation.
On camera	Dr Kpaduwa. Interviewed, not prompted

Beat	Picture and what she says
Open	Close, seated low in daylight. She names the question nobody asks at the consultation: what happens in week two.
Turn	Mid shot. The first fortnight, day by day, in plain terms: what is normal, what is not, who checks.
Heart	Two-shot over the interviewer's shoulder. Who is responsible for your recovery, by name and by role, and why that has to be settled before surgery is booked.
Detail	Cutaways: hands, a notebook, the window. She explains when to call somebody and when not to worry.
Close	Back to the close. Bring a mother or a sister into the plan, and ask for the aftercare in writing.

End card. MedLYFE. Aftercare is planned before the consultation ends.

STORY 2 · SHORT, 45 SECONDS · TOM OGBOI, ENTRANCE OR TERRACE IN SHADE

Why not just fly to Istanbul?

The hesitation	"Istanbul does the whole thing for one price."
Sent to	Anyone who mentions a quote from abroad, or goes quiet after hearing the cost.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Walking into frame at the entrance, then turning to camera. She says the honest thing first: some clinics abroad are very good.
Turn	Medium close. What the flight home does not come with: the review at day ten, the person you call at two in the morning, the scar check at six weeks.
Close	She is building here so that you do not have to choose between good and nearby.

End card. MedLYFE, Lekki. Ask what aftercare is included.

STORY 3 · SHORT, 45 SECONDS · TOM OGBOI, WARM INTERIOR

What happens at two in the morning

The hesitation	"I have read the stories, and some of them are recent."
Sent to	Anyone who has asked whether it is safe, or mentioned a complication they read about.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Close, low light from a lamp. She names the fear without dramatising it.
Turn	Medium. Before any operation there is a named person to call, a number that answers, and a plan for getting you back to the clinic.
Close	If a clinic cannot tell you who answers at two in the morning, that is your answer.

End card. MedLYFE. Ask who answers the phone after surgery.

STORY 4 · SHORT, 45 SECONDS · STUDIO, DARK PORTRAIT SET

The work nobody can point at

The hesitation	"Will I look done?"
Sent to	Anyone who has said they want to look natural, or rested, or like themselves.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Her portrait look: near black, single source. Silence for a beat, then the line: looking rested is not the same as looking younger.
Turn	Tighter. Why obvious work is a failure, and why everybody claims to be natural.
Close	The best result is the one your friends notice and cannot name.

End card. MedLYFE. A consultation starts with what you want to keep.

STORY 5 · SHORT, 45 SECONDS · STUDIO, DARK PORTRAIT SET

What I will not do

The hesitation	"Will she just sell me whatever I ask for?"
Sent to	Anyone comparing clinics, or anyone who arrived asking for one specific procedure.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Profile, then she turns to camera. The refusal list matters more than the menu.
Turn	Medium close. Three things she will not do, in categories rather than brand names, and the reason for each.
Close	Sometimes the right answer is to leave it alone, and you should hear that from a surgeon.

End card. MedLYFE. Book a consultation, not a procedure.

STORY 6 · SHORT, 45 SECONDS · STUDIO, DARK PORTRAIT SET

Darker skin is not lighter skin with more pigment

The hesitation	"Will it scar? Will it leave marks on my skin?"
Sent to	Anyone who has mentioned keloids, dark marks, or a bad experience with scarring.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Close. The line in full, as the title.
Turn	What changes in a plan for darker skin: keloid history, pigment, where an incision goes and how it is closed.
Close	Tell your surgeon about every scar you have. It changes the plan.

End card. MedLYFE. Bring your scar history to the consultation.

STORY 7 · LONG FILM, 3 TO 5 MINUTES · MEDLYFE CLINIC, CONSULTATION ROOM

What actually happens at your consultation

The hesitation	"I do not know what I am walking into."
Sent to	Everyone who enquired and has not booked. The single most useful film in the set.
On camera	Dr Kpaduwa. Interviewed, with walk-through

Beat	Picture and what she says
Open	She opens the consultation room door to camera. Daylight, a real room, two chairs.
Turn	Seated across the desk from an empty chair. The form you fill in beforehand, and why it is done before you arrive.
Heart	What she is looking at while you talk, and why she starts with what you would like to change rather than a menu.
Detail	Insert: a blank written plan on the desk. What it contains, and what it deliberately leaves out.
Close	What happens if she thinks you should not have it done, and what happens if you change your mind.

End card. MedLYFE, 25 Admiralty Way. Book a consultation.

STORY 8 · LONG FILM, 3 TO 5 MINUTES · MEDLYFE CLINIC, CONSULTATION ROOM

Who looks after you when I am not in the country

The hesitation	"Is it you, or somebody I have not met?"
Sent to	Anyone who has asked who will actually treat them, or how often Dr Kpaduwa is in Lagos.
On camera	Dr Kpaduwa and MedLYFE's physician. Two-hander conversation

Beat	Picture and what she says
Open	Wide two-shot, seated at an angle. She introduces the physician as the person who is in the room when she is not.
Turn	Singles. How they work together: what Dr Kpaduwa signs off, what Dr Ajelabi does, how a case is handed between them.
Heart	Two-shot. A real example, without a patient: the call at the weekend and what happens next.
Close	Dr Ajelabi says what a patient should ask her. Dr Kpaduwa says why she trusts her with her patients.

End card. MedLYFE. The team who treats you, by name.

STORY 9 · SHORT, 45 SECONDS · MEDLYFE CLINIC, CONSULTATION ROOM

The questions I ask before anything else

The hesitation	"Why are they asking me all this?"
Sent to	Anyone who has received the intake form and not returned it.
On camera	Dr Kpaduwa. Prompter

Beat	Picture and what she says
Open	Medium, at the desk. Before any procedure is discussed, she asks two things.
Turn	Nicotine, and why the answer changes healing. Whether your weight is still moving, and why that changes timing.
Close	These questions are how a good result is protected. Answer them honestly.

End card. MedLYFE. Complete your form before your consultation.

STORY 10 · SHORT, 45 SECONDS (THE OPTIONAL EXTRA) · MEDLYFE CLINIC, TREATMENT ROOM

What is in the room if something goes wrong

The hesitation	"Is this clinic actually equipped?"
Sent to	Anyone who has asked about safety or where the procedure is done.
On camera	Dr Kpaduwa (voice), a colleague's hands. Voice over, hands and equipment only

Beat	Picture and what she says
Open	Slow push across the treatment room, lights on, nobody on the bed.
Turn	Inserts of equipment on the trolley, a colleague's gloved hands checking it. Her voice: who is in the room and what each person does.
Close	The plan for when something goes wrong exists before anything goes right.

End card. MedLYFE. Ask to see where you will be treated.

Stills, twenty in all

Location	Count	What
Tom Ogboi	5	Environmental portraits, seated and at the entrance, daylight
Studio	7	The dark portrait look, colour and black and white
Clinic	8	Consultation room, the two-shot with the physician, equipment and hands detail

Delivery

First cuts	Ten working days from the shoot
Final delivery	Twenty working days from the shoot. Files named to the client's convention, every rush on one drive
Revisions	One round on each long and short film
Extra shorts	N14,000 plus VAT each, beyond the six quoted
Rights	All rights assign to the client on final payment, as set out in the brief
