NAME
Ilé is a working name

Ngozi lives in London. Her mother lives alone in Lekki.

An illustrative family. Her mother's last years, as they happen in Lagos today.

Needing care at home	She breaks a hip at 74, is home in four days, and has a carer Ngozi never meets.
Needing care round the clock	She can no longer live alone. The homes Ngozi finds have no nurse at night.
The last months	A cousin manages her pain at home, with no nurse and no doctor.
After death	She dies on a Tuesday. Ngozi lands on Friday. The hospital mortuary is full.

Ngozi pays for all of it from London, in pieces, and sees none of it.

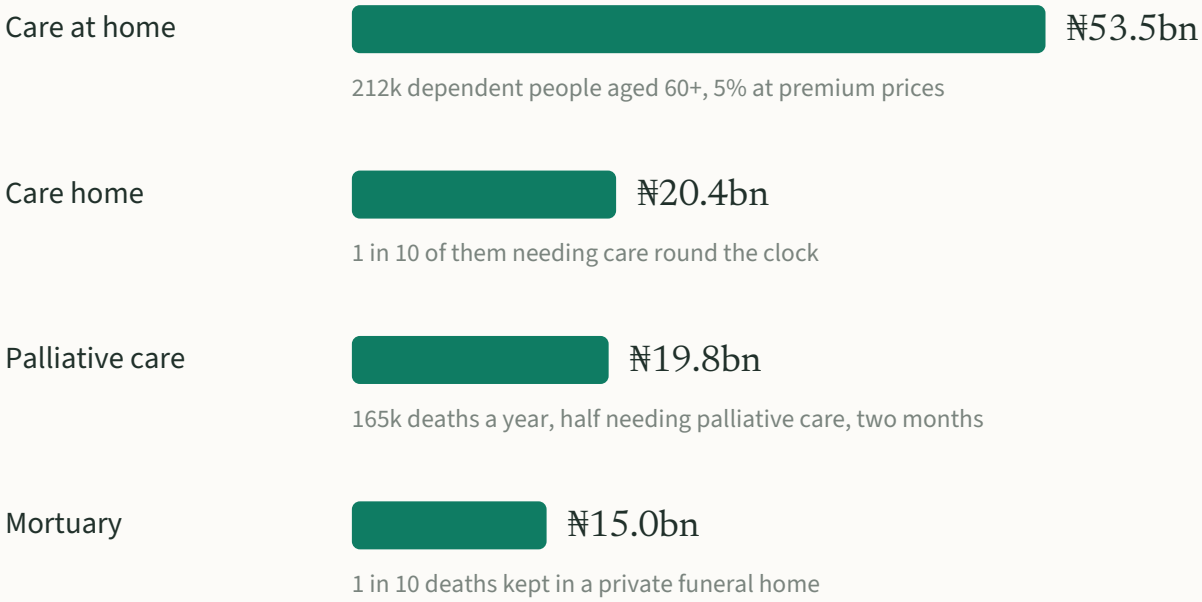

Abroad, four companies earn $11bn a year from these four stages. In Nigeria, families and informal carers fill every one.

STAGE	THE LEADER ABROAD	NIGERIA: MOSTLY INFORMAL	THE GAP
Needing care at home	amedisys $2.35bn revenue, Amedisys, 2024	Family members and untrained informal carers; a few agencies	No vetted carers. Nobody checks who enters the house, or that the visit happened.
Needing care round the clock	Brookdale Senior Living $3.19bn revenue, Brookdale, 2025	Family at home; a handful of small homes at ₦79,000 to ₦249,000 a month	No nursing-grade care home, with vetted staff, secure premises and a nurse at night.
The last months	VITAS Healthcare $1.6bn revenue, VITAS, 2025	Family at home; cancer centres and teaching hospital units	No hospice outside cancer care. Most people die at home without pain control.
After death	$4.19bn revenue, Service Corporation Intl, 2025	Full hospital mortuaries, funeral homes of uneven standard	No mortuary between Lagos Island and Epe. Elsewhere, no trusted standard.

Ilé fills all four gaps, as one company, on one family record.

Revenue from company filings; VITAS is the sum of 2025 quarterly figures. Logos are their owners' trademarks.

Lagos alone is a ₦109bn a year market at premium prices. Year five needs 3% of it.

CHECKED AGAINST MATURE MARKETS

Care home

If premium Lagos families used care homes at the English rate of 2.5%, there would be 938 residents. Our sizing uses 1,061.

Palliative care

At the American hospice rate of 51.7% of deaths, 4,265 premium families a year. Our sizing uses 4,125.

Concierge

Emoha in India charges $60 to $145 a month for check-ins and emergency cover. Ilé's ₦650,000 adds a named doctor and hospital visits.

Bottom up: Lagos 15m people, 5% aged 60+, 28.3% of those dependent, 165,000 deaths a year at 11 per 1,000; 5% of families able to pay these prices or funded from abroad. Care at home includes concierge and rehabilitation.

Ilé is three businesses that follow one family, run on one record.

01

Care at home

The front door, from the first fall to the last months.

Concierge membership	₦650,000 a month
Care at home	₦420,000 a month on average
Rehab after surgery	₦1.2m for six weeks
Palliative care at home	₦900,000 a month
Video consultations	₦30,000 each

₦1.52bn

Year five revenue, 49% of the total

"You will know who is in your mother's house, and that the visit happened."

02

Care home

20 beds, with a nurse awake every night.

Long-stay, 12 beds	₦1,600,000 a month
Step-down after hospital, 4 beds	₦85,000 a day
Palliative wing, 4 beds	₦2,400,000 a month

₦776m

Year five revenue, 25% of the total
₦33m a month full, 8% EBITDA

"Her pain will be managed, and someone will be with her."

03

Mortuary

On the Lekki corridor, where there is none between Lagos Island and Epe.

Preservation	₦18,000 a day
Preparation	₦280,000 a case
Repatriation from abroad	₦1,200,000
Autopsy and pathology	₦400,000

₦718m

Year five revenue, 23% of the total
₦60m a month full, 51% EBITDA

"She will be kept with dignity until you are home."

THE RECORD

Every service above runs on one family record, the trust layer the family abroad pays for. From Nov 2027 it is licensed to other agencies, care homes and hospices at ₦250,000 a month: ₦103m in year five.

Care at home brings the family in. The care home is where it leads. The mortuary earns from the whole city.

Care at home
From Dec 2026

Concierge members and rehabilitation patients join while still well. The record watches for falls, admissions and carer strain: the care home's admissions list.

Care home
Opens Jan 2028

Step-down beds take surgeons' patients after discharge. Long-stay residents already know the team that will care for them at the end.

Palliative care
At home or in the wing

Palliative patients at home or in the wing move to the next stage with no stranger in the room.

Mortuary
Opens Aug 2027

Most bodies come from the city, not from Ilé's own care: hospitals, insurers, coroners, churches and mosques.

YEAR FIVE AGAINST THE LAGOS POOL

Year five	Ilé	Lagos pool	Share
Care at home clients	110	10,612	1%
Concierge members	60	10,612	1%
Care home residents, two homes	22	1,061	2%
Palliative patients a year	186	4,125	5%
Mortuary families a year	667	16,500	4%

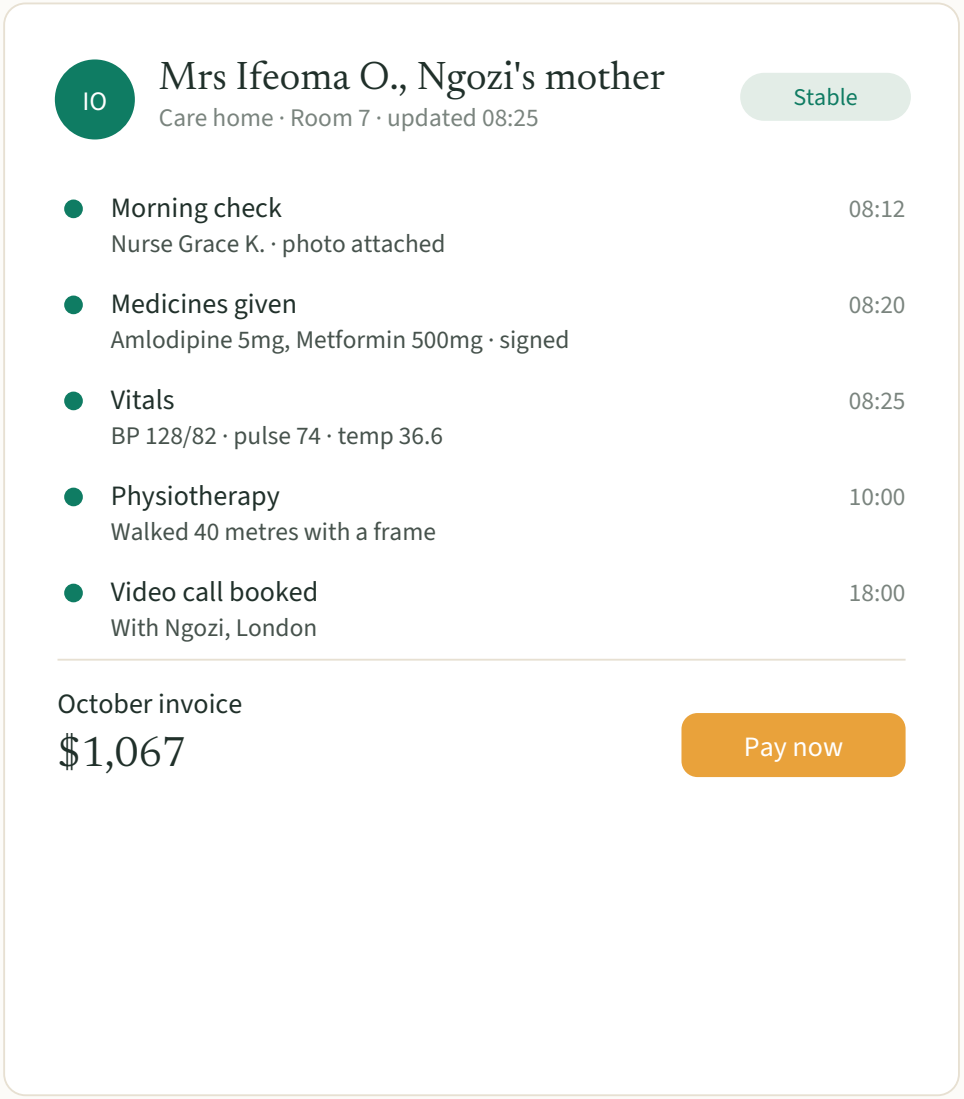

WHERE FAMILIES COME FROM

- Families abroad: diaspora associations, churches abroad, search, referral
- Families in Lagos: family physicians, churches and mosques
- Surgeons and hospitals: discharge planners, for rehabilitation and step-down
- The city: hospitals, insurers and coroners, for the mortuary

From London, Ngozi sees every visit, every dose and every reading.

Every visit is checked in and out. Every dose is signed for. Vitals are recorded against a trend. Photographs are shared where the family has consented. A written report arrives each month with one bill. The record follows a loved one from the first visit into the care home without being keyed in again.

- Every carer identity-checked, referenced and background-checked before a first visit
- Carer app works without signal and syncs when it returns
- Every clinical entry is audited: who wrote it, when, what changed
- The same record watches for escalation, which is the care home's admissions list
- Registered under the Nigeria Data Protection Act 2023 before the first family record exists

Illustrative screen. Names and readings are examples.

There is no mortuary between Lagos Island and Epe. Ilé's serves that corridor and earns the steadiest margin in the company.

Lagos families hold a body for weeks, not days, while relatives travel home and the funeral is arranged. Demand does not depend on Ilé's care book, does not move with the economy and is paid before release. Hospital mortuaries are full and private homes vary widely. A clean facility with reliable cold storage and honest prices has room in this market.

- Sited on the Lekki corridor: there is no mortuary between Lagos Island and Epe
- Preservation, embalming, dressing and viewing
- Transport within Lagos
- Receipt of remains flown home from abroad, with the paperwork handled
- Autopsy and pathology: post-mortems with histology for families, hospitals, insurers and coroners, in our own suite with a consultant pathologist
- Opens with 40 places in Aug 2027, expands to 80 in Aug 2029

At 80 places, 80% full	A month
Bodies held on an average day	64
Families served	56
Autopsies	12
Average stay	35 days
Revenue	₦60m
EBITDA	₦31m, 51%

PARTNERSHIPS AROUND IT

- Hospitals without a mortuary or pathologist: storage and post-mortems by contract
- Life insurers and HMOs: cause-of-death reports for claims
- Coroners, police and the courts: medico-legal post-mortems
- Funeral directors and repatriation firms abroad
- Medical schools: pathology training placements

Priced at ₦18,000 a day and ₦280,000 a case, inside the ₦15,000 to ₦50,000 a day Lagos funeral homes charge. Autopsy fee is an estimate.

Each competitor sells one stage. Ilé sells all four, on one record.

One family, acquired once

Joins for care at home, stays to the end.

The record fills the beds

Escalation signals are the admissions list.

Proof for the payer abroad

Every visit visible, billed in her currency.

Clinical governance

A surgeon co-founder and an acuity ceiling.

Families already pay for every stage. This round proves they will pay Ilé.

WHAT THE MARKET ALREADY PAYS

Care paid from abroad

Gerocare has sold home doctor visits to diaspora families since 2017. Reliance Health raised $40m in 2022 and sells Alafia, a health plan children buy for their parents.

Residential care

Lagos homes charge ₦79,000 to ₦249,000 a month; one charges $437 to $679, above most Nigerian household incomes.

A premium for a better mortuary

Families pay ₦15,000 to ₦50,000 a day in a private home against ₦3,000 to ₦5,000 in a public one.

Remains flown home

A recent UK case needed £10,000 to bring a body home.

Unmet need

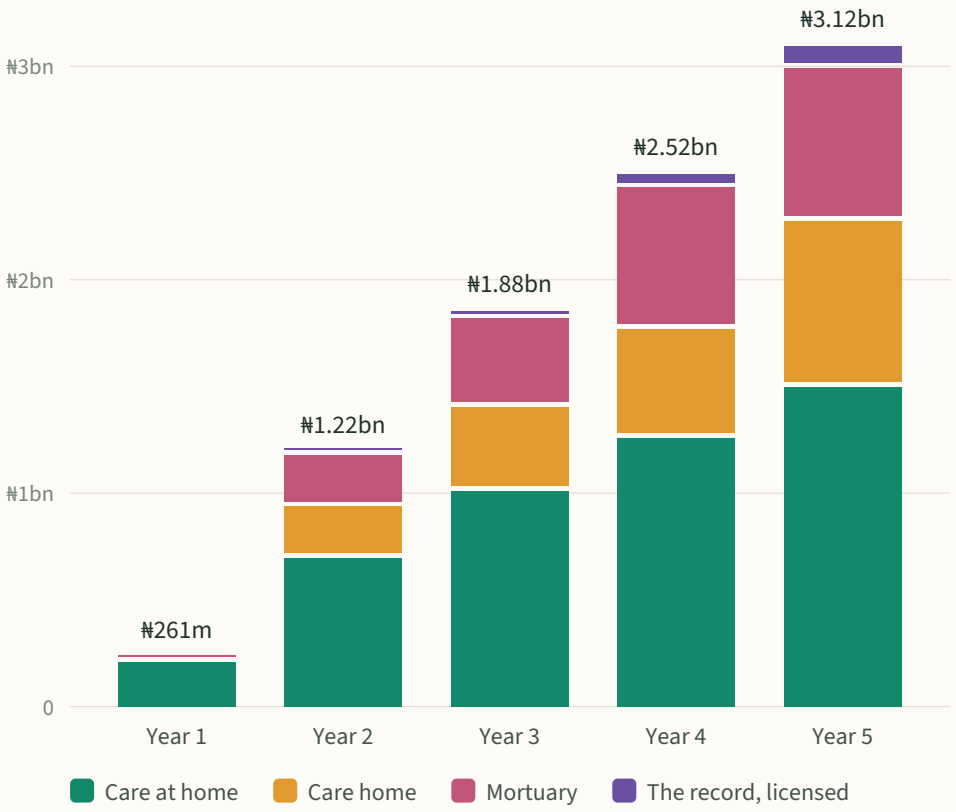

60% of older people in urban Nigeria have unmet needs for daily care.

WHAT THIS ROUND PROVES

Ilé has not yet taken a paying client. The round is built to prove four things before the care home opens:

- 60 care-at-home clients and 30 concierge members by Apr 2028
- Surgeons referring rehabilitation and step-down every month
- 7 care home places reserved with a deposit before opening in Jan 2028
- The mortuary holding 32 bodies a day within a year of opening

₦3.12bn revenue and 32% EBITDA in year five, with no further equity.

₦m	Y1	Y2	Y3	Y4	Y5
Care at home	236	719	1,037	1,284	1,524
Care home	0	243	391	508	776
Mortuary	25	241	416	663	718
The record, licensed	0	15	36	65	103
Revenue	261	1,218	1,879	2,521	3,122
EBITDA	-42	139	524	675	993
Capital spend	446	119	90	330	0
Cash, cumulative	-575	-544	-110	246	1,239
EBITDA margin	-16%	11%	28%	27%	32%

Year one is November 2026 to October 2027. Before tax. Care at home includes concierge, rehabilitation, consultations and palliative care at home; the care home includes step-down and the palliative wing; the mortuary includes repatriation and autopsy. Care home two opens in May 2030, paid for from cash flow.

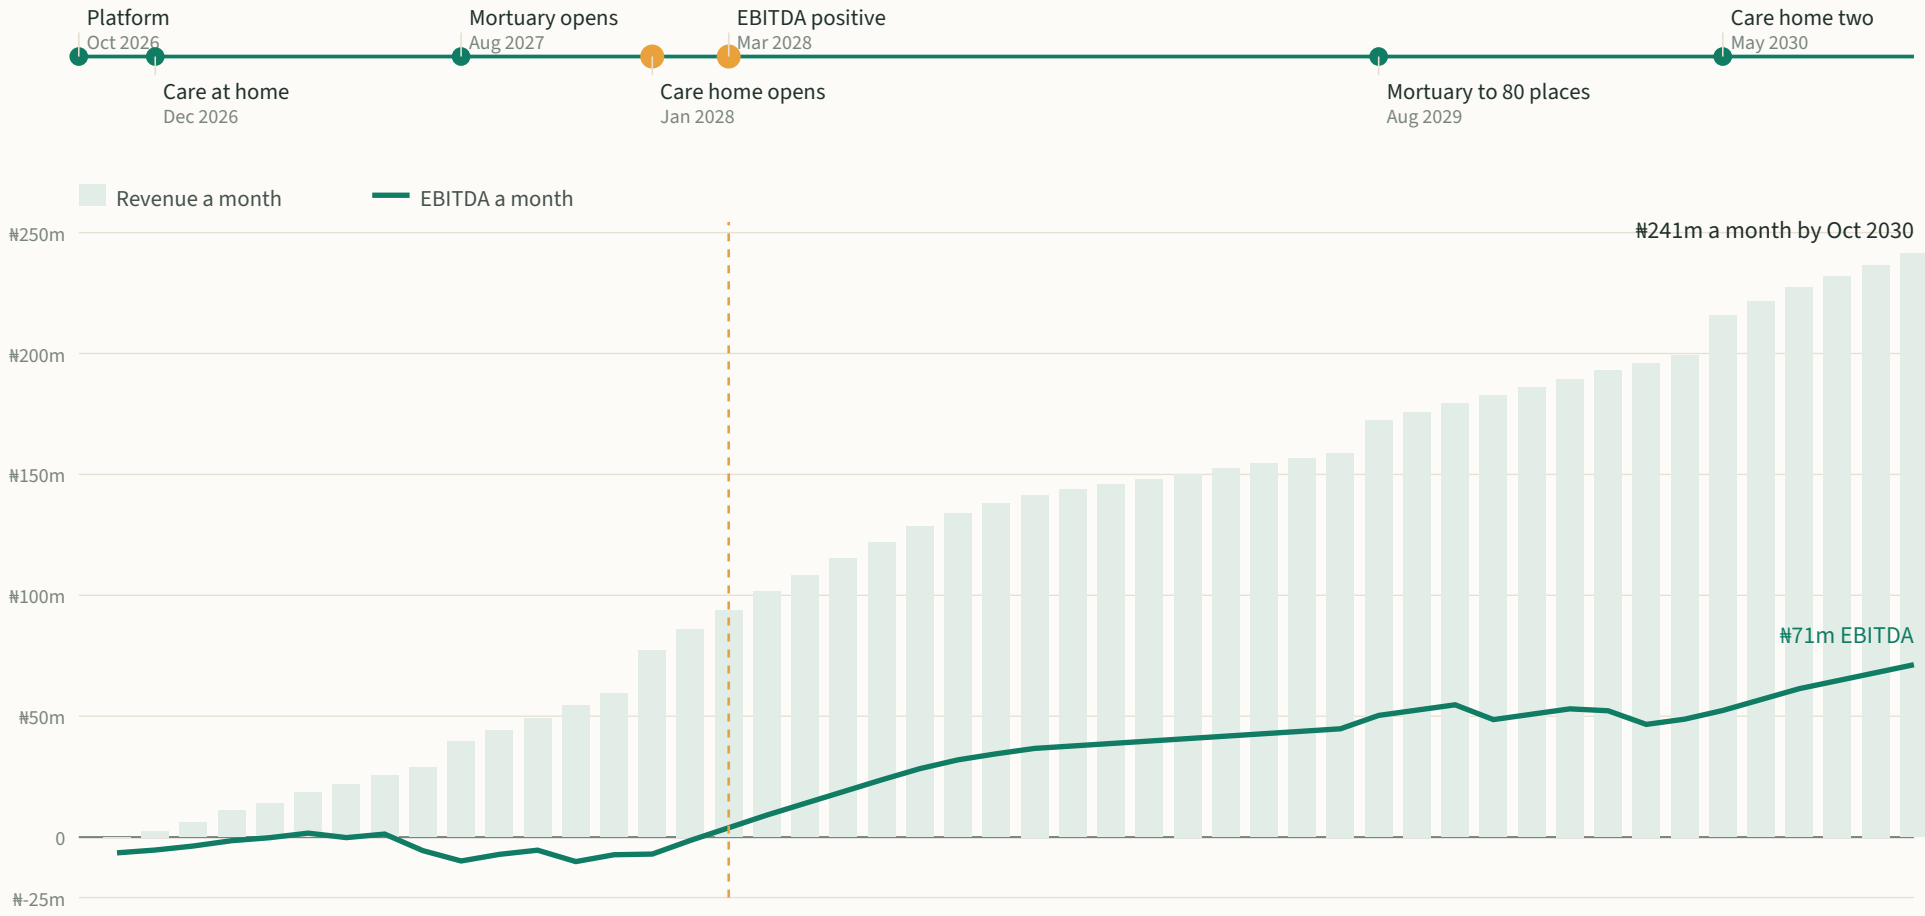

Care at home and the mortuary carry the margin. The care home carries the promise.

Service	Unit	Revenue a month	Contribution	Margin
Concierge membership	per member	₦650,000	₦325,000	50%
Care at home	per client	₦420,000	₦168,000	40%
Rehabilitation after surgery	per six-week package	₦1.2m	₦540,000	45%
Palliative care at home	per patient	₦900,000	₦315,000	35%
Video consultation	each	₦30,000	₦16,500	55%
The record, licensed	per organisation	₦250,000	₦175,000	70%
Care home, 20 beds	11 long-stay, 3 step-down, 3 palliative filled	₦33m	₦2.7m EBITDA	8%
Mortuary	80 places, 80% full	₦60m	₦31m EBITDA	51%

KEY ASSUMPTIONS

- Care home: staffing ₦13m a month loaded with on-costs, nurses on every shift; lease ₦100m a year, paid a year ahead; building works ₦200m and equipment ₦130m
- Care home opens in Jan 2028 with 7 of 20 beds filled and adds about one a month; step-down stays average 21 days
- Central team ₦5m a month rising to ₦12m; marketing ₦1.5m rising to ₦2.5m
- Naira at ₦1,500 to the dollar throughout; all figures before tax

All three businesses are trading by Jan 2028. EBITDA turns positive in Mar 2028 and keeps rising.

Cash is lowest at ₦677m in Dec 2027, before the leases and building works start paying back. The $500k raise covers it.

$500k for 30% covers a ₦677m peak, and ₦738m if the plan runs slow. No further round is in the plan.

USE OF THE $500K (₦750M)

Use	₦m
Mortuary: building, cold storage, autopsy suite, vehicles	235
Care home: building works to a licensable home	200
Care home: equipment, furnishing, nurse call, power, pre-opening	130
Leases to the low point, each a year paid ahead	140
Operating cash to the low point, net of deposits	-28
Reserve against a slower plan	73
Total	750

IF THE PLAN RUNS SLOW

Case	Peak funding
Base case	₦677m
Care home fills at half speed	₦699m
Mortuary fills at half speed	₦714m
Care at home at half the clients	₦734m
Concierge at half the members	₦717m
No licences of the record sold	₦681m
Care home opens six months late	₦607m
Care home and mortuary at half speed	₦738m

Every case fits inside the ₦750m. EBITDA is positive from Mar 2028 and cumulative cash is back above zero by Jun 2030. Everything sits in Ilé: the leases, the building works, the equipment, the platform and the licences.

At year five, Ilé is worth $5.3m to $7.9m on six to ten times EBITDA.

The round: $500k for 30%, which values Ilé at $1.2m before the money and $1.7m after. Equity value at exit is year-five EBITDA of ₦993m times the multiple, plus ₦1.99bn of cash, at ₦1,500 to the dollar, before any later dilution.

Exit multiple	Ilé's equity value	The investor's 30%	Multiple on $500k
6x EBITDA	$5.3m	$1.6m	3.2x
8x EBITDA	$6.6m	$2.0m	4.0x
10x EBITDA	$7.9m	$2.4m	4.8x

If the naira weakens to ₦2,000 to the dollar by exit, the 8x equity value is $5.0m. Families abroad pay in dollars and pounds, which softens this.

The multiples are a discount to developed markets: Service Corporation International trades at about 12 times EBITDA and Amedisys sold for about 13 times.

Licences of the record bring in ₦103m in year five, valued here at the same EBITDA multiple as the care business rather than a software multiple.

Beyond year five: more care homes in Lagos and Abuja, a second mortuary, and the same record serving each. None of it is in these numbers.

What could go wrong, and what we do about it.

Risk	What we do about it
The care home fills slowly	It opens with places reserved by deposit and filled from care at home and step-down. The model assumes 7 of 20 beds on day one.
Families object to a care home	We sell first to families abroad, who already pay others to care, and let the family record show the standard.
A clinical failure	Admissions capped at an acuity ceiling set by the clinical co-founder. Every clinical entry audited. Two hospitals agree to receive emergencies before the care home opens.
Pain relief supply	Controlled medicines are limited in Nigeria. We dispense through a licensed hospital pharmacy under the palliative lead.
The naira	Families abroad pay in dollars or pounds, which covers imported consumables and equipment.
Losing trained staff	Pay above the Lagos agency rate, a path from carer to nurse, and a clinical leadership share pool.

Capital, an operator who has built and sold a healthcare business, and a clinical standard.
