The MedLYFE Experience

A 90 second film

FOR Kakulus Media
FROM Opeoluwa, Communications Lead, Medbury Healthcare Group
DATE Tuesday 13 October 2026

In short

- A 90 second film that shows what a guest gets at MedLYFE, and lets them see themselves in it.
- The direction is slow burn: slow changes in frame, with the copy guiding the picture. The audience should be held in a trance-like state, never reading a block of text.
- Live footage from the MedLYFE centre in Lekki, with stock where the centre cannot give the shot. The live footage comes from the half day shared with the opening film.
- Final file by Monday 19 October. Please reply by Wednesday 14 October with your quote.

The reference

https://www.instagram.com/reel/DPQeBnWFFp6/?cplk=eWJ2aWN6bGZ0MTE2

Take the pace and the stillness from it.

The copy

The client's copy, as written. Each line is a few words on screen or in the voiceover, never more than one line at a time. Propose which in your treatment.

Copy	What the picture does
A moment to pause	Stillness. A quiet room in daylight
A chance to understand your body	Measurement: the diagnostics bench, a readout
A place to breathe in	A slow push into calm space
And breathe out	The release. Light, air
As you journey toward longevity and healthy aging.	Movement forward. A life outside the centre
Wellness	One clean frame per service, each held
Longevity	
Health Checks	
Weight management	
Hormones and sexual health	
Gut health	
Regenerative aesthetics	
With top-shelf care from top-shelf professionals.	The team at work, hands and backs of heads
Every experience at MedLYFE is designed around YOU.	The guest's point of view
Your needs, your goals, your wellness	
Bringing you closer to a body and mind suited for healthy aging and longevity	
MedLYFE, with the green heart	The mark resolves
Feel Good. Look Good. Live Better.	End card

What must not be in it

- No patients, no before and after, no drug or product brand names, no claim of a result.
- Staff appear as hands and backs of heads only.

Deliverables

Master	1920 x 1080, H.264, 25fps, stereo
Social	1080 x 1920 and 1080 x 1080
