MedLYFE

WELLNESS AND LONGEVITY CENTRE

For referring clinicians

A single page, so you know exactly what we do, what we do not do, and what happens to a patient you send us. Keep it by the desk.

WHAT WE TREAT

- Medical dermatology and skin: acne and post inflammatory pigmentation, melasma, keloids and hypertrophic scarring, and the skin conditions that need a clinician rather than a facialist.
- Injectables and regenerative treatment: botulinum toxin, dermal filler, bio remodelling, skin boosters, PRP for skin and hair.
- Surgical opinion: body after children, breast, post weight loss contour, and revision of work done elsewhere.

WHAT WE DO NOT DO

- We do not treat anybody who has not had a consultation and an examination.
- We do not take a patient who is actively losing weight straight to a surgical date, and we say so at the first contact.
- We do not offer procedures that the evidence does not support, however often we are asked for them.
- We do not advertise outcomes, publish patient images, or make comparative claims about other practices.

WHAT HAPPENS TO A PATIENT YOU SEND

- Seen inside five working days. If we cannot do that we tell you on the day you refer, not afterwards.
- A letter back to you after the consultation, with the assessment, the plan and the price, whether or not the patient proceeds.
- A second letter if anything changes, and a telephone call from the treating clinician if there is a complication.
- The patient comes back to you. We do not take over their general care and we do not keep them.

MONEY

- We do not pay for referrals. No rebate, no commission, no fee split, no gift. The Council forbids it and we will not be the practice that offers it to you.
- What you get instead is fast access for your patient, a letter you can file, and the same courtesy back when we have somebody who needs you.

The clinician line, not the clinic line

Call or message this number and a clinician answers. Use it for an urgent patient.

0703 052 7269

Not clinical advice or a promise of a result. The clinical decision rests with the registered clinician who sees you.
Clinical standards, protocols and sign off are set by Dr Chinwe Kpaduwa, a board certified plastic surgeon.
