The evening

- **The panel**
  Why the woman who sleeps badly, carries weight she cannot shift and dislikes her skin has one problem rather than three.
- **In conversation with Dr Chinwe Kpaduwa**
  Under her own title, The Art of Looking Like Yourself. How a surgeon decides who should have something done, and who should not.
- **The services, and what they cost**
  Said out loud, with the prices, because a room that has to ask assumes the worst.
- **Questions from the room**
  The ones people are too polite to ask in a consultation.
